# „CHAMELEON EFEKT“ / DICHROIC

## 63 - AURORA

Dekorační fólie Aurora pomocí přirozeného světla vytváří dichroický vliv na skleněné ploše. Jedná se o tzv. chameleon efekt, kdy fólie rozkládá světlo tak, že polepená plocha mění barvy v závislosti na úhlu pohledu pozorovatele.

*By using natural light as its primary source, the decorative film Aurora produces a dichroic effect on your windows or glass partitions.*
